Created! Uphill, downhill by Texas

Mandy Liebscher with its friend Dunagan on the way by Texas - radeln for the good purpose. Photo: privately

04.05.2006 -

The Glashuetterin Mandy Liebscher created its challenge even selected: At the end of April it the Benefiz benefiz-Radtour from Houston to Austin by Texas rode along. In the week courier it reports of it: Saturday-early rang to 6 o'clock in the hotel in Houston of the bells. we started 7 o'clock equivalent from the hotel with approximately 13,000 other people. And in such a way I sat now on my bicycle. and radelte... and radelte. The first 30 miles were a Klax, but then I unfortunately tightened, Texas, differently than I expected, also mountains have. On and off, on and off! After 50 miles there was noon. The sun shone sharp, it was rather hot. Nothing came there better convenient than a bath tub with ice and water, where I mean head dive in could! Then went again on the bicycle and we had now again 50 miles before us. Unfortunately the mountains did not become less and I not livelier. But I bit my teeth together and wanted to hold out. The ms available Society transporter did not make, which drove past again and again, around you to pick up to be able... more.aber me! The longer I on the wheel sat, the less could sit I on my back. Dunagan encouraged me before each mountain that he would pour me water above over the head. Finally we came to La Grange to the intermediate overnight accomodation, received from thousands people. At the Massagetisch I could be spoiled from head to foot - that did well, but rather nevertheless pain! Sunday 6 o'clock: Oh no, not soooo timely already again! My back did now to more pain than before and 80 miles on the wheel expected me. Then again mountain up, mountain off, this time under clouds. But after I had gotten accustomed to the saddle, it went completely well. On this day I drove into Dunagans lee. I think, it me motivated to stare at its tires. Against 11.30 o'clock we arrived at the midday stop. And I was well, in relation to the vortag was loaded I with energy. I could hardly wait for it to come again on the wheel. Against 14.30 o'clock we arrived then at the last stop, where Dunagans dad waited already for a long time for us. As a team we drove direction a goal then together. It was such a mad feeling to drive through under the finish banner! Created! 170 miles (274 km) geradelt in 16 hours! One hour later we had to say good-bye unfortunately to the flier. Around midnight we came into San Jose on...und I wanted only into my bed! The bicycle route was a large success. With your support I collected 1,266 dollar for the research at multiple Skerlose 306 EUR of it came from Germany. Many, thank you! Our WeFightMS.com team (19 members) in-collected altogether 20,000 dollar - madly! If want you can you still until 23 May donate: Account 4040031119 Mandy Liebscher, BLZ: 85050300 east Saxonian savings bank Dresden, reference: Ms 150 donation.
